

Etail Systems Tip Sheet

Objective: To add a link to a promotion from a product page.

The following tells you how to achieve this;-

A link to a promotion on your product page might be helpful for a variety of reasons: a link to a form where customers can order free samples, a link to a recipe or an article with information in it.

Go to Products > Product Search & get your product. Click 'Edit Product'.

You'll then need the 'Relations' section.

Scroll down past the related products etc, & you'll see the sub-heading 'Related Promotions'.

You can add a title that will appear before your promotion links – just add the text in the 'List Title' box & click 'Add Title'.

If you have more than one site, select your site from the dropdown.

Related Promotions

Display a list of Promotion links on the Product information page. Links will only display for the Site they belong to.

List Title:

Site	Promotion	Status	Display order	Edit
Etail Demo (New)	Select Promotion			<input type="button" value="Add Promotion"/>

No promotions found

Then select your desired promotion & click 'Add Promotion'. Multiple promotions can be added.

You can change the display order by using the numbered dropdown & clicking the green 'update' button. You can remove a promotion from a product by clicking the red 'remove' button.

Related Promotions

Display a list of Promotion links on the Product information page. Links will only display for the Site they belong to.

List Title:

	Site	Promotion	Status	Display order	Edit
	Please select				
1	Etail Demo	About Us	Live	1	<input type="button" value="Update"/> <input type="button" value="Remove"/>

Troubleshooting

- If a promotion isn't showing on your product page, please check the 'Status' of the promotion – it will only show on the site if it's set to 'Live'.

If you need any help with adding promotions to products, please call 0844 482 0908 or email support@etailsystems.com.
