

Etail Systems Tip Sheet

Objective: To add code to an article.

The following tells you how to achieve this;-

To add things like a Vimeo or YouTube video, or a Twitter Follow button, you'll need the code for this, which must be in an article.

Go to Site Admin > Articles, then the 'Add New Article' button.

A screenshot of the 'New article' form in the Etail Systems interface. The form includes fields for 'Last Updated' (15:15 Wednesday, Apr), 'Article Remarks' (highlighted), 'Article title', 'CSS Class', 'Status' (set to 'Live'), and 'Article Type' (set to 'Script Code' in a dropdown menu).

Add your Article remarks (for you reference) & change the 'Article Type' to 'Script Code' in the dropdown. Your page will then refresh to a slightly different screen than that of a normal article.

A screenshot of the 'Article content text' box in the Etail Systems interface. The box is labeled 'Article content text: *' and contains a large text area with a yellow border. Above the text area, there is a dropdown menu for 'Article Type' set to 'Script Code' and a small text input field labeled 'Script Code HERE'.

Paste your code into the 'Article content text' box.

Then click the 'Add Article' button.

You will usually have to add this to a promotion – please ask for a walkthrough on this if you need it.

If you need any help with this feature, please call 0844 482 0908 or email support@etailsystems.com.
